

BAR-STAR

commercial espresso machines

Introducing the la Pavoni Bar-Star series of commercial espresso machines. Newly designed to be the most technically advanced automatic/programmable dosing la Pavoni machines available.

Available in 2 group, 3 group or 4 group versions. All units feature a 4-position, power-saver switch that allows for off, sleep, 3/4 and full capacity settings, resulting in a substantial electrical cost savings. Dosing settings are controlled by a digital control pad and microprocessor. Thermal stability ensures that the groups maintain consistent temperature at all times.

Made in Milan, Italy.

BAR-STAR 3V-B

shown with optional low profile portafilter (allows for direct brewing into a 16 oz. cup) and raised cup stand.

BAR-STAR 2V-R
